

## New Frequency Directories Available!

Big News in Scanner Books & CD's from the nation's experts!

### Massachusetts, Rhode Island & Southern New Hampshire Pocket Communications Guide - 11th Edition

It's finally here! The all-new Scanner Master Guide, 11th Edition, is available as of December 2008! Over the last few years, since our last edition, there have been literally thousands of frequency, talkgroup and sub-audible tone additions and changes that have taken place making the prior edition all but obsolete. There are not only police, fire, EMS, highway department and other city service frequencies, but also power utilities, media, rail roads and transit, colleges, sports teams, malls, stores and so much more. In the state, county and federal sections we delve into nitty gritty of how systems are set-up and used, roll call times, station IDs, etc. We list exact channel usages, channel IDs, PL tones, inter-city network affiliations, etc. The accuracy and detail are unmatched. There is no other book or web site like this guide -- it's what we've been known for 30+ years. \$29.95.

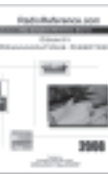

### RadioReference Database CD-ROM

The RadioReference Database CD-ROM features the complete RadioReference.com frequency database, trunked radio system information, 10-Code Lists, agency maps, files, and detailed agency information for most public safety, military, and local government communications. This is a great way to keep this incredible database handy at all times, whether or not connected to the web. An outstanding national resource. Runs on Windows 95 machines and later. Also runs on Mac OS X 10.2 or greater and even on Linux RedHat 7.3 and above. \$29.95.

### RadioReference Printed Directories

The RadioReference Printed Directories are perfect for those who want a quick reference report on a county or group of counties anywhere in the country. The directories are available in three formats: Small county areas (which covers just about the entire country); Medium county areas (the top 25 largest counties in the U.S. except for the top two metro regions); and the Large County directory which covers either Cook or Los Angeles County. These printed reports come from the outstanding RadioReference.com database and are a great resource for anyone but particularly for those without access to the Internet. Price varies.

## FREQUENCY GUIDES & ONLINE RESOURCES

Scanner Master frequencies guides are how we got our start over 30 years ago! Please check out these great frequency guides: Scanner Master Massachusetts, Rhode Island and Southern New Hampshire Guide 11th Edition (available December '08), the Scanner Master New York Metro/Northern New Jersey Guide 7th Edition, and the Philadelphia Area Communications E-book. We also carry an excellent line of scanner guides covering Atlanta, Los Angeles, Phoenix and the Pacific Northwest. We cover frequency, trunking and system information for Public Safety, Business, Federal and Military agencies and more. We include comprehensive detail on not only radio frequencies but also channel plans, unit identifiers, sub-audible tones and much more.

Frequency Guides	Price	Item #
Atlanta Frequency Directory	\$19.95	26-511129
New York Metro/ Northern New Jersey Guide - 7th Edition	\$38.95	01-510817
Northwest Frequency Directory	\$24.95	26-511130
Philadelphia Area Online Communications Guide	\$39.95	ebk001
Phoenix/Tucson Metro Directory	\$19.95	26-511128
Police Call CDROM 6th Edition (2005 - Last Edition)	\$4.95	01-521041
Racing Frequencies Online - 1 Year Subscription	\$20.00	02-600680
RadioReference Small County Directory (LA, Cook, NYC only)	\$39.95	01-511299
RadioReference Medium County Directory (one specific county)	\$19.95	01-511298
RadioReference Small County Directory (one or two small counties)	\$9.95	01-511297
RadioReference Database CD-ROM	\$29.95	42-521310
Southern California Frequency Directory	\$24.95	01-510885
Massachusetts, Rhode Island & So. NH Pocket Guide - 11th Edition	\$29.95	01-511320
Southwest Frequency Directory	\$29.95	26-511127

With the RadioReference Database on CD-ROM, finding your area's public safety information is as simple as point and click. It's packed with great features; the complete RadioReference.com frequency database, trunked radio system information, 10-Code Lists, agency maps, files, and detailed agency information for most public safety, military, and local government communications.

## SCANNER PACKAGES

Scanner Master offers unique Scanner Packages which make your purchase cost-effective and complete. With a package you get the scanner of your choice and the additional options for a discount. The BuTel ARC software for that model, a programming cable, a carrying case (for portable scanner units), different antennas, a remote head unit, a GPS receiver for the Uniden advanced scanners, or a Frequency Guide for your area and always a free Police Call CD along with savings ranging from \$20 to \$30. Packages are not available for every model. Check scannermaster.com for details.

## RACE SCANNING

When you're at the race, a scanner can take the experience to a whole new level. You can listen in as your favorite driver communicates with his spotter and pit crew. You can hear track officials, rescue workers, and the call of the race over a special radio channel. Scanner Master has you completely covered with the best racing scanners on the market, such as the Uniden BC95XLT, SportCat SC230, and the RadioShack race scanner. Check out our wide assortment of headsets, splitters, cases, antennas and other products geared for use at the track. We also offer a monthly race frequency newsletter!

## RAIL SCANNING

Listening to railroad communications is great fun and if you're a rail fan like us there's nothing better than watching passenger and freight action while listening to it all on a scanner. Hear conductors talking with engineers and engineers with the dispatchers. See our web site for details on recommended scanners and our special rail-scanning section.

## AVIATION SCANNING

From the air to the airwaves, you can monitor aviation communications with GRE and Uniden scanners. If you're a spectator of aviation, a scanner is a must to hear planes communicating to tower control while landing and taking off. Most basic scanners will allow you to hear civilian and commercial aviation radio traffic which operates in the 118-137 MHz range. (Note that you have to be within a couple of miles generally to hear the tower at an airport but the planes you can hear for dozens of miles when they're in the air. For military aviation you need more advanced scanners such as the Uniden BCD396T or the GRE PSR-500. There's nothing like bringing a scanner to a military air show and watching the planes and listening to the pilots as they conduct their maneuvers.

We also offer the incredible AirNav RadarBox which allows you to track international flights (and soon domestic flights as well) as though you were an air traffic control operator yourself. Requires a PC and Internet connection. See our web site for further details.

## GIFT IDEAS

Looking for that perfect gift for yourself a family member or friend? Someone in your house or somewhere on the other side of the country? A scanner makes a great gift no matter where you are. A scanner is fun, exciting and incredibly informative. For youngsters interested in a future police or fire career, they're a great way to learn what the job is all about. We recommend that you call or e-mail if you're interested in buying a scanner for the first time. Let us know where you live (city/county/state) and the type of scanner you want (base or portable). We'll take it from there. If you have a relative who already has a scanner and you're looking for an accessory to give, one of our scanner books is always a great choice or software for their scanner perhaps (see our software list - you just have to know the type of scanner they have). Otherwise a gift certificate is always a great way to go!

1-800-SCANNER • WWW.SCANNERMASTER.COM

## ABOUT SCANNERS

Scanners keep you in the know better than the local news, provide a sense of security, and all the while scanners can be both exciting and fun. When buying a scanner for your home, work or as a gift, there are a number of key points to remember: Determine the type of radio system your local town and county uses. Most communities still use basic radio systems that can be "scanned" using low-end/inexpensive scanners. A low-end scanner though will not have the features, such as alpha-tagging allowing the scanner to display "Chicago Fire" rather than a frequency. Your area may also use advanced radio systems which will require a more expensive scanner. Some areas, even in remote and rural regions, require an expensive digital scanner to listen. With a scanner you'll hear both mundane, everyday, police operations as well as exciting chases. You'll hear the fire departments rush to the scene of emergencies. It's all real and it's all live. Scanners inform, educate and excite. It's a great way to introduce youngsters to careers in public safety. For adults, listening to scanners will open your eyes to all that's going on around you. Scanners are also used by public safety agencies to keep tabs on adjacent departments, by the news media, by colleges and corporations to stay aware of the situation around their campuses, by neighborhood watch groups who support their local police, and by sports fans who take scanners to the track.

## CHOOSING THE RIGHT SCANNER

Are you new to scanners or are you buying a scanner as a gift? Not sure which scanner to buy? Not sure if you need a digital (high-end) scanner, a trunking (mid-range) scanner with alpha tags, or whether a low-end model will do for the area in which you'll be scanning? We can help! Send an e-mail or call us at 1-800-SCANNER and tell us the city, county and state where you live (or if it's for a gift, let us know the city/state where it will be used.) We'll do the research and let you know your best options. There's no easy answer as to which scanner will best suit you. You can also decide whether you would like us to program the scanner before it ships, making it ready to use right out of the box.

## SCANNER PROGRAMMING

As scanner technology advances to keep up with new communications systems, scanners have become increasingly complex to set-up and program. Scanner Master is the nation's leader in scanner programming. This service is for those who do not have the time to program the scanner for their area, or for those buying the scanner as a gift. The service is particularly worthwhile for those who do not feel up to the technical challenge of determining the correct frequencies as well as understanding and programming trunked and other advanced radio systems. Once a scanner is programmed properly you may never have to touch the programming again. We offer programming for scanners purchased from us or for scanners you already own. Our service includes researching and programming complete with frequencies, alpha tag descriptions, trunking systems, talkgroup IDs and more (for radios that accept these parameters). Radios will be ready-to-use when they're received. The cost for the service is based on the scanner, the number of channels and systems being programmed, and the amount of frequency research needed. The cost for a non trunking radio is \$29.95 to program if you bought the scanner from us and \$39.95 for pre-owned. A trunking radio is \$69.95 if you bought the scanner from us and \$89.95 for pre-owned. For special requests that exceed the standard area that our HomeTown Programming covers, send an e-mail to support@scannermaster.com and tell us what scanner you have (or wish to buy) and the counties and state that you want. Pricing depends on the scanner type and the complexity of the radio systems in your area. Generally we program police/sheriff, fire and EMS unless otherwise requested.

## DIGITAL & RE-BANDING: YOU MAY NEED A NEW SCANNER!

Many areas are now replacing old radio systems with high-tech digital systems. Most can still be monitored with advanced digital scanners. If you can no longer hear the police in your area you probably need a new scanner. Also, be aware, most Motorola trunking systems will be "re-banding" requiring either a new scanner or a scanner firmware upgrade.

## WWW.POLICESCANNERS.NET

Coming in 2009 will be the ultimate scanner resource center. This new web site will be an easy, fully automated way to find the best scanner for you and your area. Also included will be a detailed scanner comparison section. Constantly being updated, you can be sure the scanner you choose will include all the right features to allow you to hear all available public safety frequencies in your area.

## ABOUT US

Since 1978 Scanner Master has been producing the nation's most comprehensive communications guide, including the all new Scanner Master Massachusetts, Rhode Island and Southern New Hampshire Pocket Communications Guide 11th edition, the Scanner Master New York Metro/Northern New Jersey Guide 7th Edition, and Monitor America. For over 15 years Scanner Master has also been a consultant to the scanner-radio industry. We participate in the design and development of many scanners on the market and also develop and produce unique and custom scanner accessories. Today we are the nation's oldest and largest Scanner-only dealer. All we do is scanners so our focus and our experience in this radio category is absolutely second to none.

## MONITORING SYSTEM SOLUTIONS & CONSULTING FOR MEDIA & BUSINESS

As the industry's leading scanner consultant, no dealer or distributor is more knowledgeable about scanner functionality and operation and frequency data. Scanner Master can work with you to develop customized monitoring systems. Applications include remote, over-the-web, monitoring stations. We have a large media and insurance/restoration industry clientele which have installed our sophisticated monitoring solutions, both software and hardware-based. See our ScannerStation software for further details. Our consulting services include radio room/assignment desk design; antenna tower design; on-site system installation, training and more.

## DEALER, AFFILIATE PROGRAMS & QUANTITY DISCOUNTS AVAILABLE

If you wish to sell scanners and accessories through your retail or online store, or if you wish to purchase in quantity for yourself or for your public safety agency or corporation, affiliate and dealer programs as well as quantity discount programs are available. Contact us for details or send in a RFQ. Scanner Master is a proud partner of radioreference.com.

## HOW TO ORDER & STORE LOCATION

You may order online with our secure website, by phone, e-mail, or you may mail in your order for payment by check or money order, sorry no COD's. Orders paid by check will ship when the check clears. There is a \$25.00 fee for any returned checks. Shipping rates for these mail orders are one flat rate. UPS Ground shipping for all radio's and most antenna's is \$15.00 each. Books, CD's and Accessories will be shipped USPS Priority Mail for \$6.95. Call for expedited shipping options and fees. Additional shipping charges may apply for oversized packages or multiple items. UPS orders cannot be shipped to Post Office Boxes. MA residents only add 5% for sales tax. International orders may be placed online only with a valid credit card. All internet and phone orders paid by credit card will be calculated with live shipping rates from UPS & USPS, these rates are determined at the time the order is placed. Faxed Purchase Orders are accepted for qualified corporate accounts only. We are located at 19 Willow St. in Natick, just north Natick Center off of Route 27 on the second floor. Visitors by appointment only, walk-in accepted only during special holiday hours. See our web site for further details of all our products and services. Watch for news about our Scanner Museum now in development!

## GIFT CERTIFICATES & WRAPPING

Order a scanner and have it programmed by Scanner Master to make scanner gift-giving simple. For an additional fee, Scanner Master will personally wrap your gift and take the burden off your Holiday To Do List. Standard gift wrapping is a flat rate of \$3.00 and available on most items. Purchase a Scanner Master Gift Certificate and let the scanner hobbyist in your home purchase exactly what he or she desires. Gift receipts are also available to send a special note with the package.

## OUR GUARANTEES

- 30 Day Money Back Guarantee: Hardware products are under warranty for 30 days from date of purchase. See our web site for policy details.
- New Products Only: All products are brand new in the manufacturer's original packaging.
- Same Day Shipping: Applies to all orders placed Monday through Friday (except holidays) by 3 PM EST.

19 Willow St. Natick, MA 01760

## SCANNER SOFTWARE

Scanner Master is the North American distributor of the world's finest scanner software. BuTel ARC (Advanced Radio Control). BuTel software is easy to use, incredibly versatile and powerful. With BuTel you can enter your own frequency information into the spreadsheet-like form or you can access the RadioReference.com online database (with a subscription) and then download frequencies and trunking systems right into most PC programmable scanners.

ARC8600 (AOR AR8600)	\$69.95	01-520880

## SCANNER ANTENNAS

There is no better way to improve reception, whether for base or mobile scanning, than by adding an outside antenna. For home or office scanners we recommend a base station antenna, such as the Discone for all-band monitoring. If you want to really improve performance on a single radio band, check out our professional base station antennas, either omnidirectional or directional for most receiver gain. Aiming a yagi (beam) antenna at a station or region that uses a common band (such as 800 MHz trunking or 460 MHz UHF) will pull in signals you never dreamed of. For mobile scanners we urge you to mount a mobile antenna somewhere on your vehicle. Getting the antenna out from under the steel roof of your car or truck will provide a huge improvement. Not everyone wants another antenna on their car so we offer various types and mounting options. For portable scanners you can buy antennas tuned to specific bands, (such as 800 MHz) some of which will improve trunking performance, but other bands will suffer. Other wide-band portable antennas provide some general improved reception across all bands.

Base Antennas (All-Band unless noted)	Price	Item #
800 MHz 2.5db Gain BNC	\$29.95	14-540716
AB-PRO-128A VHF Air Band	\$29.95	36-541266

1-800-SCANNER • WWW.SCANNERMASTER.COM

Some software is available in Basic or Pro versions. Both versions will allow you to both program your scanner and remotely control it when connected to your PC. The Pro version will also allow you to record scanner audio to WAV files on your computer and store logs of communications activity. Lite versions provide programming only. BuTel Software is available on CD or via instant download from our web site! For further details, screen shots and demos check out the software section on [www.scannermaster.com](http://www.scannermaster.com).

### ScannerStation - For Professional/Business Use

ScannerStation(tm) is a modular software package designed for professional communication monitoring stations such as News Media, public safety or insurance/restoration firms, who desire intensive but structured monitoring of multiple scanners (the BCD996T and BCT15). The scanners can also be remotely located using the optional Scannerstation server software with our ScannerOverIP technology. This technology controls the remote installed scanner using the internet including live audio streaming with full audio recording and playback. ScannerStation makes scanning and playback far easier. We also offer turnkey system solutions including on-site installation and training. See our web site for a video and further details. Similar software also available for the 785/796 scanners.

### ScannerStation Lite - For Personal/Home Use

ScannerStation Lite allows you to control either 2 or 4 scanners at one time from one software program on one PC. All communications can be recorded to your computer hard drive for easy playback. With this personal version of our commercial software you will have full control of all scanners, can set in advance special event scanning sessions, display additional information for each channel that you don't see on the scanner screen itself, mute all scanners or all but one scanner with a single keypress and much more. It's a great new way to control multiple scanners while adding functionality you never had before. Remote scanners are not possible with ScannerStation Lite (only with the commercial version). Besides the PC and some additional hardware the program requires either BCT15 or BCD996T scanners. See our web site for more details. Available December '08.

## BASE/MOBILE SCANNERS

A base/mobile scanner is designed to be used in the house or the car. Some of the models below are considered desktop models (the BC340, BC370, BC898, PSR200, PRO-136) and these are for home use only. If your scanner is going to stay in one place in your home or office, a base/mobile or desktop is the way to go over a portable scanner.

**Uniden BC340** 10-501048  
\$89.95

- 100 channels in 10 banks
- Service Search
- Full frequency LCD display
- Lockout, priority channel
- 30-512 MHz Coverage
- AM/FM clock radio w/30 presets
- Weather Channels
- Easy to use and well designed

A basic desktop scanner for areas with conventional radio systems. Great for the night table or family room. We love the AM-FM radio.

**Uniden BC898T** 01-500866  
\$199.95

- Multiple Channels (500) in 10 Banks
- TrunkTracker III Technology
- DCS/CTCSS
- S.A.M.E. Weather Alert
- The easiest base scanner to use!

The only trunking (non-digital) scanner made anymore with a big-box base design. Has a great, large thumbwheel for easy channel or frequency tuning. PC programming/control. CTCSS/DCS capable but no alpha. It's so easy to use! An all-around classic.

**GRE PSR-200** 30-501182  
\$99.95

- Skywam
- PC Programmable
- Backlight LCD Display
- Sleek and versatile design
- Easy to use Buttons
- Standard BNC Connector

Entry-level simple to use non-trunking 200 channel desktop with 10 channel-storage banks. One Touch weather SAME alert.

**RadioShack PRO-136** 30-501332  
\$99.95

- 200 Channels 10 banks
- NOAA SAME Weather Alert
- Service Searches
- AM/FM mode, clock with alarm
- Cool new scanner design!

This desktop scanner is designed for less-complex, non-trunking radio systems. Great for those areas that have no trunking or digital. Convenient for the night table or family room.

**Uniden BC370** 10-501057  
\$129.95

- 300 Channels in 10 Banks
- All Hazard Alert
- AM/FM Radio
- Service Search
- Atomic Clock
- Weather Scan
- Alarm Clock with Snooze
- Easy to use and well designed

An upgrade from the BC340CRS, this model also includes an All Hazards/Weather Alert function, alarm snooze and more memory.

**Uniden BCT15** 10-501061  
\$219.95

- 2500 Dynamic Alpha Memories
- TrunkTracker III (no digital)
- Temporary Lockout
- Location-Based GPS Scanning
- BearTracker™ Warning System

A great (non-digital) trunking mobile scanner that can also be used as a base. Includes pre-programmed state and local police frequencies & trunking. PC programmable. Select from the 50 state menu. Add in thousands of frequencies too with alpha tags.

**GRE PSR-400** 30-501184  
\$199.95

- Triple Trunking Desktop/Mobile
- Motorola Analog, EDACS, LTR
- SAME (FIPS) / Weather alert
- Signal strength meter
- Spectrum Sweeper
- PC Programmable

1000 Channels analog trunking base/mobile scanner packed with great features including easy-to-read back lit control and display and so much more. Great for the home or call in non-digital areas.

**RadioShack PRO-163** 22-501221  
\$219.95

- over 1,000 channels
- 1,500 talk groups
- Signal Stalker
- 6 service searches
- Alpha-tag display

This base/mobile is ready to go in the home or car with analog trunking (the scanner is not appropriate for digital areas). Great size and design with backlit display. Easy to use for a trunking scanner. Comparable to the PSR-400 above.

**Uniden BC350** 01-500851  
\$99.95

- 100 Memory Channels
- Preprogrammed Service Search
- Covers VHF, UHF and 800 MHz
- Backlit Display
- 100 ch/sec Scan Speed
- AC adapter and DC cord included
- A basic, super-compact, mobile

Low-cost, small, basic mobile scanner that can also be used in the home. Uses up/down freq. programming. Includes 800 MHz.

**Uniden BCD996T** 10-501050  
\$495.00

- APCO 25 Digital Trunking
- Location-Based GPS Scanning
- Temporary Lockout
- 6000 Dynamic Memory channels
- Close Call™ RF Capture
- Dual-Color Alpha Display and more!

The ultimate trunking APCO-25 digital scanner. Uses advanced Dynamic Memory Management. This scanner does it all! Covers all bands, is PC programmable, with Close Call and much more.

**GRE PSR-600** 30-501186  
\$499.95

- APCO-25 Digital
- Motorola Analog, EDACS, LTR
- SAME (FIPS) / Weather alert
- Signal strength meter
- Spectrum Sweeper
- PC Programmable

A super-advanced base/mobile digital scanner. Superior digital voice decoding quality. Huge memory which allows you to page in different regions on command. Many unique features. A radio star!

**RadioShack PRO-197** 30-501333  
\$499.95

- Digital APCO-25/analog receiver
- Alpha-text backlit display
- Signal Stalker
- PC Programming Capability
- Easy to use controls

Radio Shack's newest digital base/mobile scanner is bursting with great features. This scanner is comparable to the GRE PSR-600 above. Superior digital voice decoding capabilities. Firmware is field upgradeable. Great size and design for home or the car.

## PORTABLE SCANNERS

Choose the portable scanner below that's right for your area. Some areas require a high-end trunking or digital trunking scanner. For other areas a low-cost basic scanner is fine. If you want to take your scanner between homes in your home or office, or between home and the car and to sporting events or the mall, a portable scanner is the right choice.

**Uniden BC72XLT** 01-500882  
\$89.95

- 100 Channels / 10 Banks
- Compact Design, backlit display
- Close Call™ RF Capture
- 10 Search Ranges / 8 Svc Search
- 2 AA Battery Operation
- Easy-to-program basic (non-digital and non-trunked) handheld scanner. Fits in your shirt pocket. Covers VHF & UHF.

**Uniden BC95XLT** 10-501105  
\$109.95

- 200 Channels in 10 Banks
- Standard Programming Operations
- Compact Design, backlit display
- Close Call™ RF Capture
- 2 AA Battery Operation
- The features of BC72 but with 200 channels and 800 MHz (no trunking). PC programming. Great for truck use.

**Uniden SC230** 01-500884  
\$179.95

- 1600+ channels with alpha text
- Dynamically Allocated Memory
- Compact Design, backlit display
- Race Track Operation w/PL&DPL
- Close Call™
- Runs on 2 AA's
- The Sportscan scanner designed for racetrack use. Program by car number or use as a standard scanner.

**Uniden BC246T** 01-500881  
\$209.95

- Compact Size runs on 2 AA's
- TrunkTracker III Technology
- Close Call™ RF Capture
- 3000+ dynamic memories
- 12 Service & 10 Prog. Searches
- An all-time favorite. Compact design fits in your shirt pocket. Has a 2-line alpha display. We love this radio!

**Uniden BR330T** 01-501012  
\$299.95

- .1 MHz - 1.3 GHz coverage
- 2500 Dynamically Allocated Channels
- TrunkTracker III
- Racetrack Operation
- Close Call™ RF Capture
- Alpha Tagging
- The only trunked scanner that also covers the AM and Shortwave bands from 500 KHz to 25 MHz.

**Uniden BCD396T** 01-501003  
\$495.00

- APCO 25 Digital Scanner
- TrunkTracker IV all trunking modes
- Close Call™ RF Capture
- 12 Preprogrammed Service Searches
- 6000 dynamically allocated memories
- PC Control/Programming
- Top-of-the-line trunked digital scanner workhorse that's slim but powerful. It's packed with incredible features. A hit!

**RadioShack PRO-106** 22-501331  
\$499.95

- Signal Stalker
- 16 Character Alpha-tagging display
- Digital/Analog trunking scanner
- Thousands of memory channels
- PC Programmable
- Firmware upgradeable.
- The RadioShack version of the GRE PSR-600 scanner. Superb digital voice decoding quality.

**RadioShack PRO-135** 22-501249  
\$99.95

- 200 channels 10 banks
- One Touch Search
- Signal Stalker I
- Pre-programmed searches
- The Pro-135 hand-held scanner is a great way to get started in the hobby if there is no trunking or digital in your area. Easy to program and control.

**RadioShack PRO-137** 22-501220  
\$179.95

- 1000-channel memory
- Alpha-Tagging display
- PC Programmable
- Signal stalker
- Head for the track! Listen in on your favorite drivers talk to the pits as they race. Cool design, great display.

**RadioShack PRO-162** 22-501273  
\$219.95

- 1,000 channels in 20 memory banks
- NOAA SAME Weather Alert
- Signal Stalker I
- Alphanumeric display
- RadioShack's newest analog trunking handheld scanner. Includes the superior Signal Stalker I technology. A fine receiver for everyday use.

**RadioShack PRO-164** 22-501221  
\$219.95

- Triple Trunking Handheld Scanner
- Alphanumeric backlit display
- Signal-strength meter • WX Alert
- Signal Stalker II • PC Programming
- 1,000 frequency memory, 10 banks
- Comparable to the PSR-300 above this is an all around fine trunking scanner with lots of great features.

**AOR AR-Mini** 19-501313  
\$299.95

- Want a great compact scanner that covers down to the AM broadcast band? The AOR AR-Mini is it. This scanner does not trunk or do digital but it includes AOR's high-quality RF circuitry combined with their always well thought out design. This is a brand new model from AOR.

- GRE's powerhouse has amazing digital voice decoding capability, great audio and loads of features and memory.

## SCANNER ACCESSORIES

Scanner Master carries every possible scanner accessory including replacement battery packs, ac adapters, carrying cases, desktop scanner stands and so much more. Our filters are great for limiting interference and our pre-amplifiers are outstanding for boosting signals and bringing in distant-stations. Many accessories come from Europe and Asia and are exclusive to Scanner Master.
